#1: Center Position Design

We have reviewed every Waste ▪ The Impossible ▪ Irregularity and pursued improvements on efficiency. An ergonomically efficient design, which places the user centrally between the sink and the stove to maximize convenience and comfort.

#1: Center Position Design

■ Double Tool Container (Standard)

You will be able to store items usually stored in base cabinets in the stove or sink cabinet.

Therefore, although there maybe a dish washer in your plan. your storage capacity will be maintained.

This will enable easy access to all utensils stored under the stove and sink.

▪ Stove Side “Tool Container”

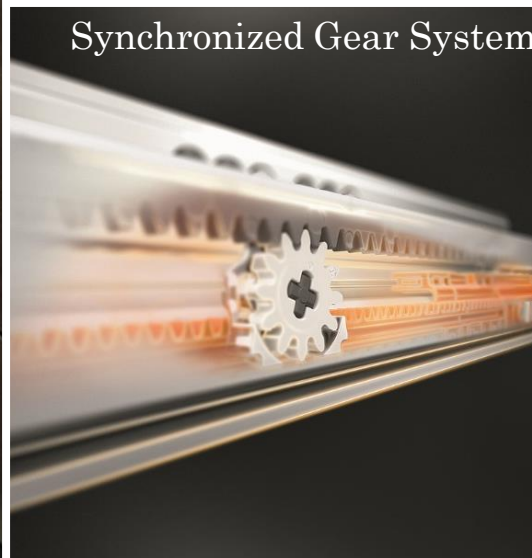

▪ Sink Side “Tool Container”

#1: Center Position Design

■ All Slide Storage Rails

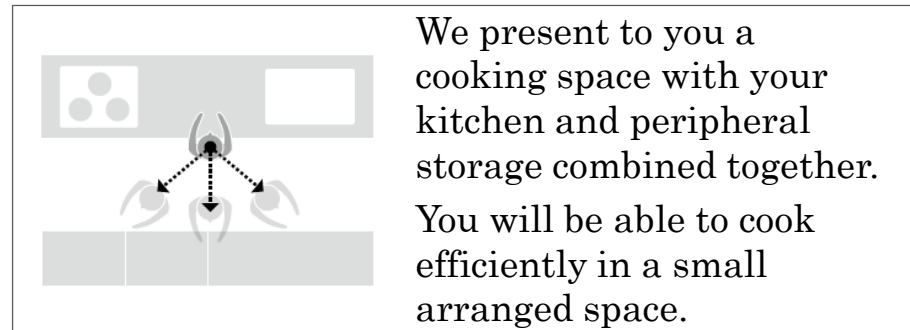

- LEGRABOX: The most significant rail system from Blum

#1: Center Position Design

■ Systemized Area Storage

We present to you the peripheral storages center position. Systemized Area Storage with Counter will be available. You will be able to cook efficiently in a small arranged space not only on the storage side, but also using the cooking space widely by combining your kitchen with an appliance storage.

#2: Craftsmanship

Centro, your kitchen for life symbolizes Cleanup's commitment to craftsmanship

■ Craftsman Deck Sink (JL)

On Board Style

Upper Frame: Vibration
Combine with Stainless Steel,
Artificial Marble, Ceramic

Bright Edge

Opened Layout

#2: Craftsmanship

■ Craftsman Deck Sink (JL)

By creating the deck you have twice the work area.

Work securing space for tidying up or serving will be reduced to half. The plate will not be in the sink so there will be enough space for the cooking and sink side. It is a sink that is not compromised in terms of space.

#2: Craftsmanship

■ Craftsman Deck Sink (JL)

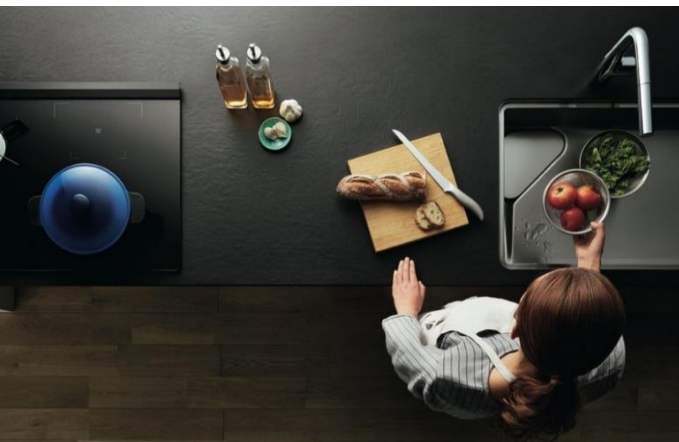

The deck incorporates an extended work surface.

This multi purpose zone can be used for cooking and washing up.

You will be able to rinse directly using a faucet with a secure 34mm deepness. This allows you to cook without any hesitation. And of course the e-Coat is applied so you will have a multifunction space with high cleaning performance.

■ Craftsman Sink (JS)

The Cube Design style of the under mount sink boasts clean straight edges. A straight and sharp form only possible by hand.

Size: W900 x D430 x H185

#2: Craftsmanship

■ Door: 00 Series Painted Door “Kyoyuzen Pattern”

Finishing with enhanced depth feeling is expressed by devoting a great deal of time and effort coating 11 layers. Your kitchen will become an elegant design just like wearing a Japanese Kimono.

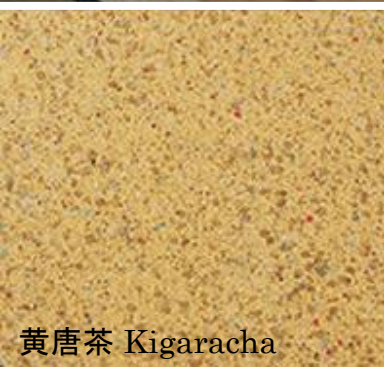

Kyoyuzen pattern's forming method.

“Seared Dyeing” as its motif

Supervised by Yoshikawa Sensho & Co (Established 1897)

11 Layer Coating

#4: Item Description

#4: Cabinet

■ Stainless Steel Cabinet

The stainless steel cabinets withstands against water, humidity, insects, and dirt so your kitchen will remain clean eternally.

#4: Cabinet

■ Floor Container · Riser Form

Storage using the foot level space efficiently.
It is a Door Surface Material Spec so it will match very well with your interior.

Storage height clearance 190mm
(When kitchen height is 850mm)

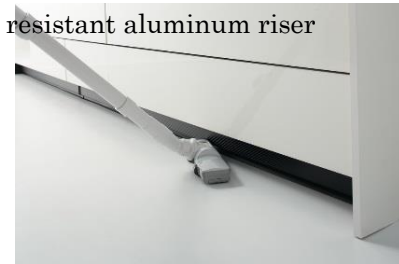

18mm clearance from the floor

Front Side Tray

Scratch resistant aluminum riser

■ Black Design

A luxurious sensation is expressed by unifying all storage design to black.
Float Design makes you feel as if your kitchen is floating.

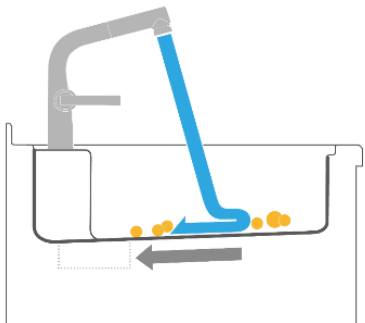

#4: Sink

■ Stream Flow Sink

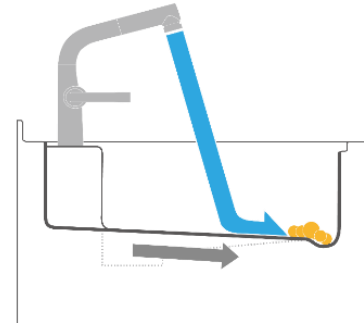

【Conventional Sinks】

Dirt will keep accumulating in the corners since conventional sinks cannot create water flow.

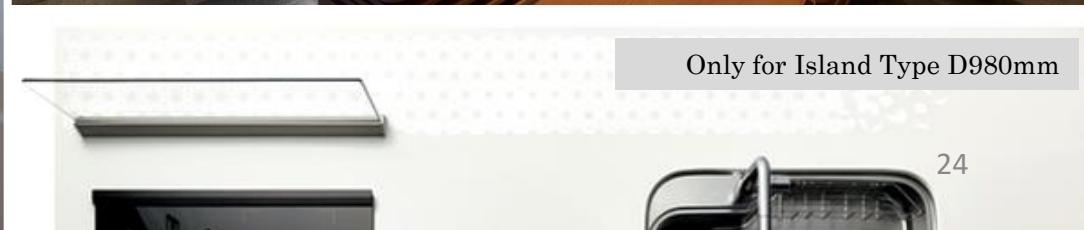

【Stream Flow Sink】

With the Stream Flow Sink, corners where dirt tends to accumulate have a waterway structure so it forces the dirt to be carried away towards the drainage.

#4: Countertop

■ Artificial Countertop: Caliza and Grace Series

#4: Countertop

■ Ceramic Countertop

Higher efficiency than artificial marble to enhance your cooking

■ KYOYUZEN Door “00 Series”

■ KYOYUZEN Doors’ Design

Door series with a motif of “Seared Dyeing”, a traditional patterning method of Kyoyuzen Kimono, expresses an enhanced depth feeling.

It was displayed in our booth at the 2016 Salone del Mobile di Milano as a top board above the sink.

Supervised by Yoshikawa Sensho & Co (Established 1897)

Website: <http://www.kyotoyuzen.com/en/>

Material Motif

Hand Painted Yuzen by an artisan

2016 Salone del Mobile di Milano DAIDOCORO

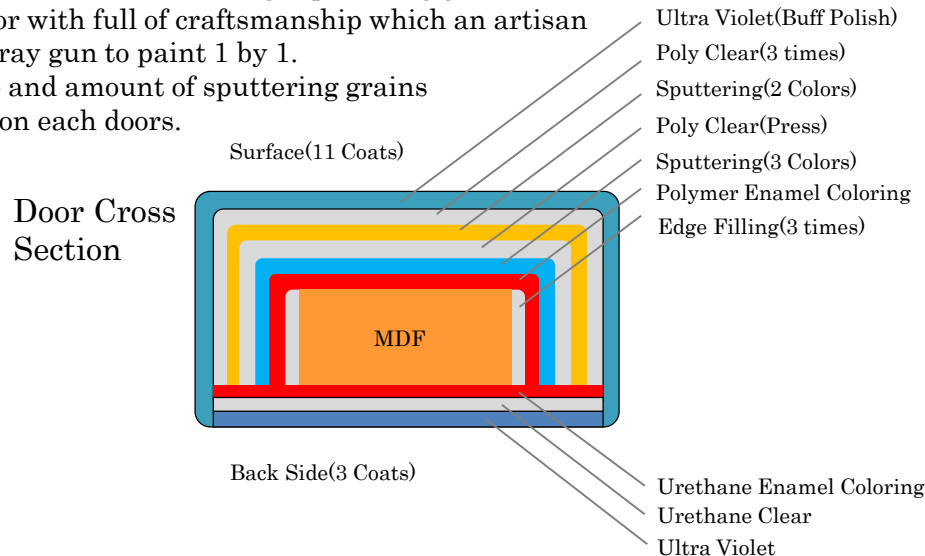

■ Painting Process

Small sputtering grains and clear layer in 3 colors are coated fist. Then 2 colors of large sputtering grains are coated over to express the enhanced depth feeling. Finally, with the 3 clear coating and ultra violet coatings, a high mirror finish is completed.

A vivid shine can be seen when light hits the door with the silver and gold pearl paint material used in the large sputtering grains.

It is a door with full of craftsmanship which an artisan uses a spray gun to paint 1 by 1.

*The size and amount of sputtering grains differs on each doors.

Buff Polish			

■ Stainless Steel Polished Door: Tiger Eye

A 3 dimensional design is expressed by applying a 3 degree angle spin polish on stainless steel.

You will be able to enjoy different expressions when light hits the colored surface. And at the same time, the design will match very well with your interior.

※The 3 degree angle prevents pattern shifts between the doors.

■ Natural Wooden Veneer Door : Couture

Walnut is one of the 3 precious trees in the world along with Teak and Mahogany. It is used in many luxurious furnitures from its beautiful reflection and deep wood grain design.

Lamina is rarely seen and it is a material with very little weakness. By lining up random thin sliced natural wooden veneers, you hardly notice the randomness.

※Since the material is natural wood, the color may change depending on the environment.

※Finger joints may be seen on the edges of side panels.

※ 1 Lamina

※ 2 Finger Joint

■ Tool Container (Sink Cabinet)

Shallow Pallet

Just the right drawer to store thin items under the sink.
Perfect for storing cutting boards (Up to D240mm), cloths, or even pot holders.

Tool Box

Trays to store different kinds of small utensils or plastic wraps perfectly are in the Tool Box. You will also be able to store 5 knives with up to 400mm length. You are able to customize the positions of trays and knife holder the way you like.

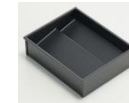

〈When you would like to reach different kinds of small utensils more easily.〉 (In a width 1050mm cabinet)

Removable

• Accessory Tray (Wide)

The slanting design allows you to spot your utensils very easily.

• Accessory Tray (Slim)

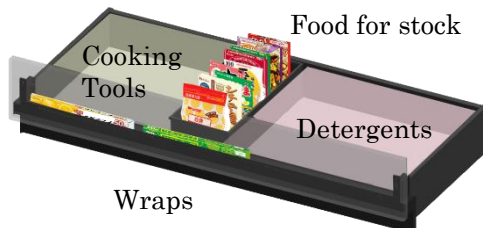

A suitable storage for narrow chopsticks or wraps.

〈When you would like to reach knives or plastic wraps more easily.〉 (In a width 1050mm cabinet)

Floor Container

Packaged ingredients, pouched foods, dried foods, flour may be stored perfectly in the Partition Tray. (Not available for existing piping.)

Drawer

Suitable storage for strainers or bowls that are frequently used in the sink and even cooking tools, ingredients, and spices.

■ Tool Container (Stove Cabinet)

1st Drawer ▪ Side Drawer

Small spices will fit perfectly in the tray.

When having stove cabinet with grill.

When having grill-less stove cabinet.

Tool Container

You will be able to store frequently used frying pans, saucepans, and even ladles on the front side.

Drawer

You will be able to store tall bottled ingredients or cylindrical pots in the front, and pots or frying pans or other ingredients in the back.

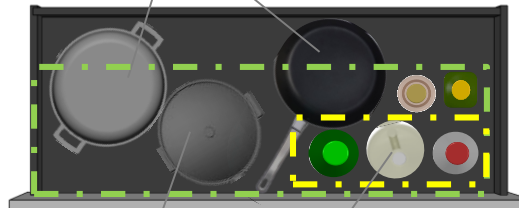

Saucepan (Within H110mm) Frying Pan (Within Φ 250mm)
